

# M2 Office Technology

Removes up to 99.9% of airborne contaminants

*"The Irish Chamber Orchestra Studio selected M2 Office Technology to implement an air cleaning solution for our studio, lesson rooms, office and canteen so that all occupants could have the proven peace of mind of clean air when using the facilities."*

**GERARD KEENAN**  
**CEO OF THE IRISH CHAMBER ORCHESTRA**

**Name:** Irish Chamber Orchestra

**Location:** Limerick, Ireland

## Challenges

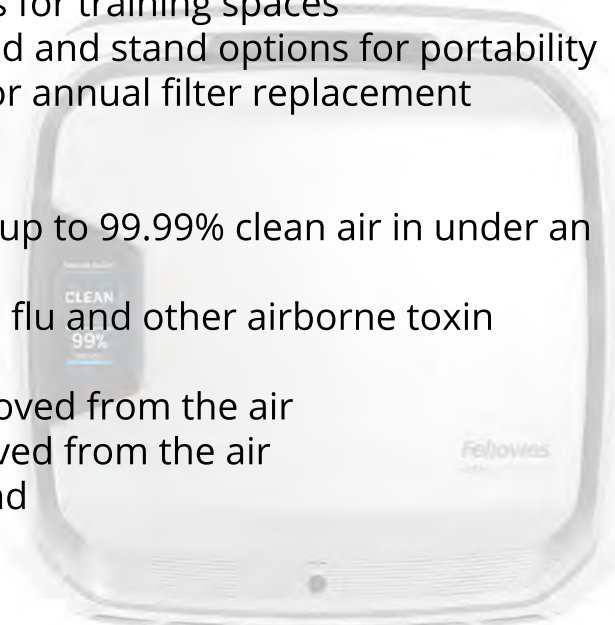

Creating a safe working environment for performers and students in a high occupancy area with a ventilation system that would remove any airborne virus particles including Coronavirus and quite enough not impact on recordings.

## Solutions

- Multiple units capable of cleaning the air in large capacity environments
- Smaller units for training spaces
- Wall mounted and stand options for portability
- Scheduled for annual filter replacement

## Benefits

- Guaranteed up to 99.99% clean air in under an hour
- Coronavirus, flu and other airborne toxin removed
- Odours removed from the air
- Pollen removed from the air
- Peace of mind

***"Staff and performer safety is of utmost importance and we wanted to put in as much protection as possible as we learn to live and work in a covid world. So we evaluated how we were going to go about each area in the facility in response to the pandemic and air purification in a high occupancy space became a focal point for us. We know now that that outdoor spaces are much safer than indoor spaces when it comes to the transmission of covid so we needed to improve the air quality for our indoor spaces which included all of our office space, meeting rooms, toilets and practice areas.***

*We approached M2 Office Technology who offered us a solution through their air purification system given they're locally based and more importantly their air purifiers **cleaned the air to a degree of 99.9%** and are proven to be effective against Coronavirus. I think what surprised me most was how fast the system actually worked. Rooms were running at 99.9% in under an hour and the system kicks in whenever there is an air change. **You wouldn't even notice the device is on.***

*The air cleaning system they installed create a clean environment and they also create a tangible way for people to see that and know that they're in a clean environment. The units are there and as a reminder of the precautions that we're taking throughout the facility here at the Irish Chamber Orchestra Studio. Staff are more comfortable with the air purifiers in place. **M2 Office Technology helped us plan out what device needed to be in what space** and then installed all the units with their team, it made it a very easy project for us. In some cases it made more sense to have the units on stands instead of wall mounted and M2 were great at helping us identify that.*

*The **running costs are so low and the annual filter change is on M2's schedule** so we don't even have to worry about that, they take care of everything and we get an air filtration system that is always running at an optimal level. I can highly recommend M2 Office Technology, they did a great job made the whole process simple and gave us the best options for our facility."*
