4Line

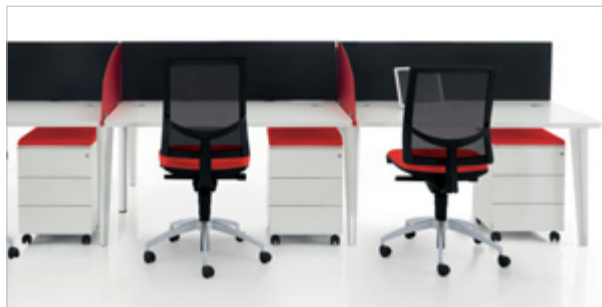

4Line is one of the solutions available in our System furniture collection, aiming to answer all individual and collective workspace needs. Easy to assemble and capable of adapting to evolving usage requirements, 4Line is an exercise in the optimisation of space and costs.

"4LINE is built around an elegant yet sober conceptual design, expressed through crisp lines and refined detailing. The range is exceedingly popular among my colleagues, whether in individual trade marketing spaces or more collaborative and teamwork orientated environments."

YANNICK BELLEC Commercial Director Europe

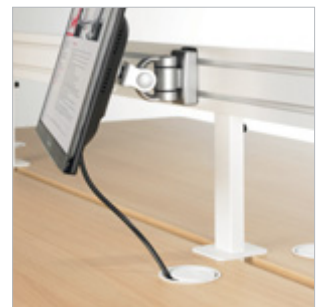

Ideally suited to teamwork settings thanks to shared-leg configurations and multiple layout designs

Shared-leg configurations allow the incorporation of desktop screens and other accessories. The legs are set back to **facilitate freedom of movement between desks.**

1 High-density particle board, 30 mm thick, with a decorative sheet of melamine on both sides of the top and rounded edges. Strip of ABS 2 mm thick fitted to desktop edging. Worktops feature 1, 2 or 4 'EOL' cable ports in matching finish to the legs. These are composed of an outer ring \varnothing 8cm incorporated in the worktop and \varnothing 6 cm snap-in element for feeding cables through.

2 Fixed rounded triangular metal legs. Decorative trim fold running along the length of the legs on the 2 outer faces. Stabilizer feet adjust through 15 mm. Worktop height: 74 cm.

3 Fixed metal legs, fitted with cable management features and a removable housing cover on the inside of the leg. Cabling can be fed through from the base of legs to the worktop. Quick and easy assembly or reconfiguration of work-surfaces thanks to identical mounting bracket design for both independent and shared leg structures. Worktop height: 74 cm.

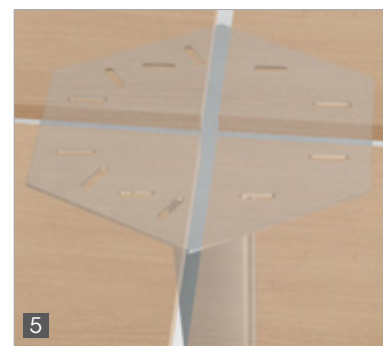

4 Height-adjustable legs with detachable housing cover on the inside of the leg. Lower section of the leg with integral height gauge to facilitate symmetrical adjustments. Worktop height: from 62 to 86 cm, adjustable at 2 cm intervals. Additionally, stabilizer feet adjust through 15 mm.

5 Shared central support leg, allows joining of up to 4 worktops to a single metal mounting bracket.

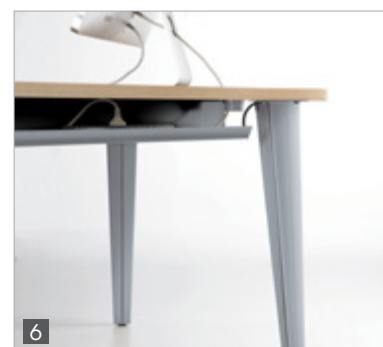

6 Multifunctional cable trough and structural beam, included with desks of W. 160 and 180 cm. Optional for worktops of W. 120 and 140 cm. The cable trough design allows concealment of electrical trailing sockets and cables, on either visitor or user sides. Fitted with tie-straps for securing of cables. Usable dimensions: D. 94 x H. 85 cm.

7 Mounting plates for attaching a desk-height pedestal to the worktop. Replaces the supporting leg on compact desk return units.

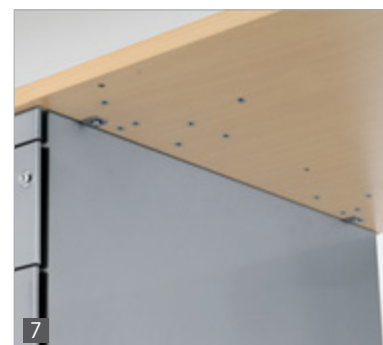

8 Optional metal modesty panel, attaches by means of screws and metal inserts. Height 24 cm.

4Most

A totally flexible solution for the creation of effective individual and collective workspaces, the 4MOST system furniture adapts to the constantly evolving needs of your business.

The range offers:

- A variety of rectangular and triangular-section Frame or Bridge leg designs
- Easy reach storage solutions for Bench units
- Efficient cable management solutions thanks to sliding worktops or cable ports integrated into fixed worktops
- Highly customisable workspaces, thanks to a large selection of colour schemes and options allowing effective visual and acoustic isolation

"This is the new and much improved Bench range. 4Most has taken the concept of easy reach storage to the next level, inviting us to a fresh vision of well-being and productivity in the office. Such a versatile and modular range helps you efficiently define boundaries between individual workstations and spaces adapted to collaborative processes or teamwork."

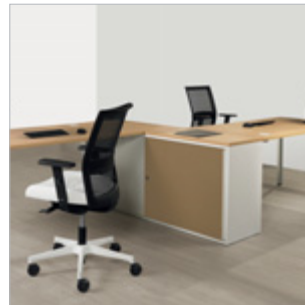

STÉPHANIE GONZALEZ ROCHER Category manager – desking – Product marketing

Evolving as a team

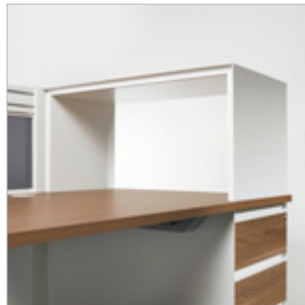

Easy reach storage units help you **define and personalise your workspace**

The main supporting cupboard units with sliding doors offer a versatile and modular storage solution, thanks to a design allowing users to access contents from one or both sides of the unit. A vivid colour scheme, matching seamlessly with desktop panel screens, infuses the workspace with a decidedly contemporary feel.

A variety of leg designs allows the creation of a workspace that perfectly fits your needs, whether with single desk layouts or more collaborative setups, based on multiple desks and shared leg configurations.

Standards and Technical specifications

1

1 High-density fibre board top, 25 mm thick, with a decorative sheet of melamine on both sides of the top. 2 mm thick ABS edging, matching the worktops. 2 mm thick ABS edging, matching the worktops.

Worktops feature a cable port, composed of an outer ring (ø 8cm) incorporated in the worktop and 'EOL' design snap-in cap (ø 6 cm).

4 leg designs :

- Bridge leg, rectangular cross-section – fixed H. 73.5 cm or height-adjustable from 62 to 86 cm

- Bridge leg, triangular cross-section – fixed H. 73.5 cm or height-adjustable from 62 to 86 cm.

- Frame leg, rectangular cross-section – fixed H. 73.5 cm.

- Frame leg, triangular cross-section – fixed H. 73.5 cm

2 Fixed Bridge leg, rectangular cross-section 60 x 30mm composed of:

2 uprights and 1 horizontal crossbar. Leg attaches to the top by means of a perforated 2 mm thick pressed sheet metal top plate.

1 beam mounting bracket for attaching an extremity of the desk crossbeam.

2 black ABS end caps fitted with stabilizer feet, adjustable through 20 mm.

2

3 Fixed Frame leg, rectangular cross-section 60 x 30 mm. Identical features to the Bridge leg, with an additional horizontal crossbar at the base in order to close the frame.

4 Bridge leg, rectangular cross-section, height-adjustable. Height is adjustable at 2 cm intervals by means of a notched rectangular-section tube, fitted inside the lower section of the leg upright.

5 For asymmetrical compact desks with return. Additional stability is ensured by a W. 120 cm horizontal crossbar, spanning the base on the return side.

6 Structural support is provided by a tubular-section 50 x 20 mm crossbeam. Optional cable troughs can be fitted to the crossbeam to store electrical trailing sockets and cables.

7 Fixed Bridge leg, triangular cross-section 59 x 59 x 80 mm. One piece design with invisible welding.

1 beam mounting bracket for attaching an extremity of the desk crossbeam.

2 brackets welded to the inner face of the leg to support the worktop.

2 triangular ABS grey polypropylene end caps, fitted with stabilizer feet, adjustable through 15 mm.

13

14

15

11 Bench leg structure W. 165 cm is available with fixed legs of rectangular or triangular cross-section of either Frame or Bridge design. It is adapted to receive fixed or sliding worktops and shared use of support legs in face-to-face workstation setups. A central 50 mm gap separates adjoining worktops.

12 Crossbeams/bars spanning the desk rest on a central leg, designed as a shared support element between two structures. The legs are set back to facilitate freedom of movement between workstations.

13 The central 50 mm gap, separating adjoining face-to-face worktops, is designed to receive technical desktop screens with an integrated accessory rail. Screens attach with screws directly to the upper horizontal leg brackets. Inner panels available in either Altuglas® or fabric.

14 15 Sliding worktops facilitate unimpeded access to cables and trailing sockets stored in the central cable management trough located under the worktops. Troughs are made from 7/10 sheet steel and feature a vertical partition with opening that allows the routing of W. 400 x H. 60 mm electrical trailing sockets. Worktops slide open through 100 mm. Degree of extension is limited using 2 thumbscrews, with 2 additional thumbscrews locking the worktop in a determined user position. For fixed worktop configurations, the high-capacity cable management trough is secured in position between 2 worktops by means of a pair of 2 mm thick sheet steel brackets. Usable Dim.: D. 20 x H. 4.5 cm.

16 17 18 19 20 The structure of supporting returns is made from 19 mm thick melamine panelling, except in the H. 71 cm version that features a 25 mm thick structural top and base. Cupboards with H. 113.5 cm have a 25 mm thick structural top. Return units fitted with sliding doors can be incorporated as a structural component of a workstation. They allow access to contents either from user side or both front and back sides. An interior partition panel divides the space into two distinct storage units. The desks with supporting return are not certified NF Environnement.

16 Return modules H.55.2 cm. Optional melamine shelves. Sliding doors made from 4 mm thick Altuglas® panels. Integrated circular chrome door handle grip. The supporting return module rests on 5 rectangular or triangular cross-section metal feet, matching finish to the workstation leg structure.

17 Return modules H.71cm. Two fixed melamine shelves. Melamine sliding doors fitted on runners (with integrated thumbscrew for door adjustments) in an aluminium track. Recessed metal handles sit flush with the door edge. Central locking. Supporting return modules rest on adjustable stabilizer feet that can be accessed from inside the module base.

20 Three drawer filing unit, featuring 2 box drawers and 1 filing drawer. Available as a structural support element when incorporated into a central column configuration. Worktops are secured to the back of the 3 drawer filing units.

4Wave

With its original, innovative and highly functional design, the 4Wave collection stands out as an ergonomic solution to user wellbeing in the office. Every aspect has been studied to deliver a desk that optimises worktop, structure and leg cable management solutions and is capable of adjusting to any user's requirements.

"I am particularly fond of the 4Wave collection design concept, for it conveys a resolutely dynamic sense of purpose. It completely reinvents the traditional office desk leg design, as much in its aesthetics as in its functionality."

MARC JITIAUX Inventor *Designer of the 4Wave collection*

Shaping your professional image

Generous work surfaces, optimised with a **coordinated range of storage and meeting solutions.**

The 4Wave collection offers 3 different structural designs combined with 2 leg types. Modesty panels (metal or melamine) fitted to 'L' shaped legs facilitate effective horizontal cable management and ensure users' privacy at all times. Cable troughs can be mounted on the crossbeams spanning the space between 'I' shaped legs, and are ideally suited for use in face-to-face desk configurations.

A design that projects
**ergonomic functionality
and aesthetic harmony,** from
desktops to legs.

Technical specifications

1 High-density particle board, 25 mm thick, with a decorative melamine sheet on both sides of the top. Strip of ABS 2 mm thick fitted to edges..

2 Worktops feature cable ports, composed of a wave-like decorative yet functional support (W. 18 x D. 9 cm), an outer ring (ø 8 cm) incorporated in the worktop and 'eol' design snap-in cap (ø 6 cm).

3 Fixed 'I' and 'L' shaped legs composed of a square-section tubular vertical bracket topped by a fixing plate, 2 tubular elliptical feet and adjustable stabilizer feet matching the steel-aspect finish of the leg. Decorative outer leg housing cover with grooved panel design. Worktop height: 73.5 cm.

4 The leg housing incorporates a vertical folded sheet-steel panel that links the top fixing plates with the feet, providing 2 cable channels and additional vertical structural rigidity to the desk. As a result the leg structures serve an additional practical purpose of feeding and safely securing cables, whilst at the same time separating power from data cabling.

5 Adjustable 'I' shaped leg composed of 2 machine-welded elements and 2 telescopic housing panels. Identical cable management features to the fixed leg version. Worktop height: from 62 to 86 cm, adjustable at 20 mm intervals.

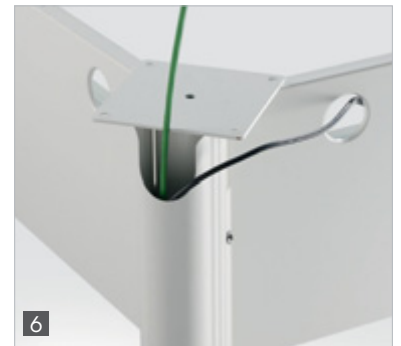

6 Fixed circular-section tubular steel structural leg functioning as linking point for modesty panels and steel crossbeams, as well as facilitating 90 or 120° angle desk configurations. Features a grooved housing panel held in place thanks to eyelet perforations and M6 screws.

7 Melamine modesty panel, 19 mm thick and H. 30 cm. Adapted to 'L' shaped leg structures. Features 2 cable holes so that cables can be fed through from the legs to the worktop.

8 Metal modesty panel, H. 30 cm. Adapted to 'L' shaped leg structures. Features 2 cable holes so that cables can be fed through from the legs to the worktop. Integrated cable management trough H. 11 cm x D. 5 cm, fitted with 2 tie-straps for securing of cables. The cable trough design facilitates concealment of trailing sockets and cables.

9 Tubular crossbeam, 80 to 180 cm in length, to be mounted on 'I' shaped legs. Tool-free assembly by slotting the extremities in to respective housings that are welded to the leg brackets.

Cable trough designed to be fitted to the crossbeam, fitted with 2 tie-straps for securing and channelling of cables.

Pure Evolution

With its sleek column-like leg designs, the Pure Evolution range offers itself as an elegant and expertly crafted choice of office furniture.

Pure Evolution is a range infused with the spirit of innovation: desks are designed for assembly by just one person and without specialised tools. This is made possible thanks to the lightweight self-supporting legs, practical slot-in crossbeam and the use of thumb screws to secure the uprights to the worktops.

"A singular technologically advanced yet simple range, Pure Evolution is a definitive expression of modern workstation design."

ROMAIN BOURBOULON Marketing Director

Pure Evolution is a range of office systems offering maximum adaptability. Fixed and height-adjustable cylindrical legs are available in 'Y' and 'L' shaped dispositions. A branched base structure provides a further practical configuration solution for meetings.

Technical specifications

1 25 mm thick high-density particle board, covered with a sheet of decorative melamine on both sides of the top. Edges protected by a 2 mm thick strip of ABS matching the top.

2 Worktops feature cable ports, composed of an outer ring (ø 8cm) incorporated in the worktop and 'eol' design snap-in cap (ø 6 cm).

3 Fixed 'I' shaped legs composed of a metal tubular bar at the top designed to receive knurled knobs (for easy tool-free securing to the worktop), a circular-section tubular metal bracket ø 70 mm to which are welded sheet metal feet fitted with adjustable stabilizers. Worktop height: 73.5 cm.

4 Fixed 'L' shaped legs, with identical design to the 'I' shaped legs. Worktop height: 73.5 cm.

5 Optional vertical cable management column for fixed legs, in sheet metal 10/10 mm thick. Fixed with hooks to the inside of the legs. Cables can be fed through both upper and lower extremities. A version that attaches to the worktops is also available for adjustable leg models.

6 Tubular-section crossbeam (50 x 30 mm) ranging from 80 to 180 cm in length, designed for mounting on legs. Tool-free assembly by slotting the extremities into respective housings welded to the leg brackets.

7 Height-adjustable 'I' shaped leg composed of a metal tubular bar at the top, a telescopic circular-section tubular metal bracket (male/female ø 60/70 mm) that slides within an injection moulded ABS ring. Legs are locked into position at desired height by means of 2 M6 screws. Worktop height: from 62 to 86 cm.

8 Height-adjustable 'L' shaped legs, with identical design to the 'I' shaped adjustable legs. Worktop height: from 62 to 86 cm.

9 Cable trough designed to be fitted to the crossbeam, with the purpose of concealing electrical trailing sockets and cables. Made from 10/10 mm sheet metal, height 10 cm and ranging in length from 90 to 130 cm.

Twin Distal

TWIN DISTAL is a dynamic and contemporary office furniture range, fusing practicality and aesthetic design to produce highly flexible and adaptable work space configurations: from the basic individual workstation, to managerial desk solutions or the more versatile teamwork-orientated shared structure workstations.

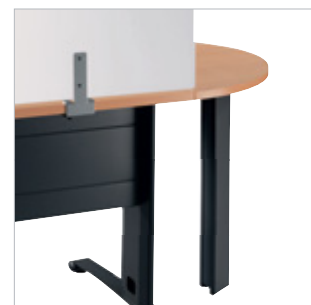

"TWIN DISTAL is an ideal choice for teams engaging in project work, the range lends itself perfectly to efficient collaboration in a harmonious work environment."

MAGALIE JAURON Product Manager – System furniture

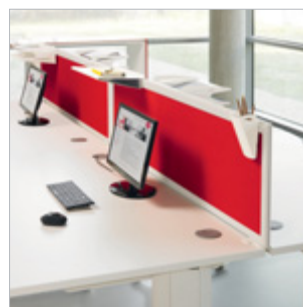

Storage and extension
units to complement
to the workstations

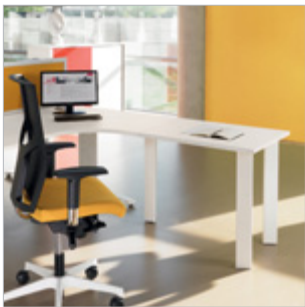

TWIN DISTAL allows shared structure configurations: a shortened base leg is incorporated as a shared support for adjoining worktops, facilitating movement between workstations and collaborative work.

Technical specifications

1 High-density fibre board worktop, 25 mm thick, with a decorative melamine sheet on both sides of the top. 2 mm thick ABS edge banding, matching the worktops.

2 Tops feature cable ports, made from injection moulded ABS (ø 80 mm).

3 Fixed « I » shaped legs composed of a pressed sheet metal top plate, uprights in folded sheet metal with removable sheet metal clip-on leg panels, curved design steel base element fitted with elliptical ABS end caps and adjustable stabilizer feet. Cables are channelled within the leg structure behind the removable panels, and exit through openings in the upper and lower extremities. Worktop height: 73.5 cm.

4 Fixed « L » shaped legs, with identical design to the « I » shaped legs. Worktop height: 73.5 cm.

5 Metal modesty panel, attaches directly to « L » shaped leg structure. Made from sheet metal 0.7 mm thick, with 2 grooves running the length of the panel for additional structural rigidity. Height 375 mm. Epoxy coating matching the « L » shaped leg finish.

6 Shared leg with shortened base designed to support 2 adjoining worktops: a cost-effective and ergonomic solution. Available in fixed « I » shaped leg and fixed « L » shaped leg versions. Identical design to the « I » and « L » shaped legs except for the shortened base element (475 mm) facilitating greater freedom of movement for users. Leg clip-on leg panels are shorter than on the standard legs, providing an opening to allow cables to be fed uninterrupted between end sections.

7 Height-adjustable « I » shaped legs composed of a pressed sheet metal top plate, centrally positioned upper pillar and lower pillar housed in a telescopic folded sheet metal panelling. Features a curved design steel base element fitted with elliptical ABS end caps and adjustable stabilizer feet. Cables are channelled within the leg structure behind the removable panels, and exit through openings in the upper and lower extremities. Worktop height: from 63.5 to 86 cm, adjustable at 2 cm intervals.

8 Height-adjustable « L » shaped legs, with identical design to the height-adjustable « I » shaped legs. Worktop height: from 63.5 to 86 cm, adjustable at 2 cm intervals.

9 C-shaped folded sheet metal crossbeam, 1 mm thick with opening on user side. Fixed element, secured with screws to « I » and « L » shaped legs. 2 circular openings (ø 60 mm each) allow cables to be fed through from the worktop to the desk structure. Facilitates concealing of numerous electrical trailing sockets and cables. Grey aluminium epoxy finish. Dimensions: height 95 mm and depth 60 mm.

New Duplex

New Duplex is a cost-effective and highly functional range of desks procuring a wide array of solutions for the modern workspace. Traditional spaces are effortlessly optimised with multiple layout and configuration possibilities. A classical and universal styling that will respond effectively to every user's expectations.

"New Duplex is a practical range of office furniture, ideal for achieving conservative and robust workspaces."

PATRICE PLUMAIN Quality Coordinator

Fully operational

Aesthetically coordinated extension units and complementary furniture.

Workstations are all fitted with cable ports, facilitating efficient cable management. Height-adjustable legs allow the desks to adapt to the unique morphology of individual users.

Technical specifications

1 25 mm thick counterbalanced high-density particle board, covered in melamine, with 2 mm thick ABS edge banding.

2 2 ABS cable port in an aluminium grey finish, \varnothing 80 mm.

3 Metal 'L' shape legs with epoxy lacquer coating. Optional addition of clip-on housing panels of curved design. ABS end caps matching the leg finish.

4 Fixed leg version composed of a pressed sheet metal top plate, rectangular uprights in folded sheet metal with removable housing panels, oblong shaped tubular-section metal base fitted with adjustable stabilizer feet. Cables are channelled within the leg structure behind the removable panels, and exit through openings in the upper and lower extremities. Worktop height: 73.5 cm.

5 Height-adjustable legs feature 2 telescopic folded sheet metal housing panels.

6 Height-adjustable version composed of a pressed sheet metal top plate, rectangular uprights in folded sheet metal and formed by 2 rectangular metal columns (upper and lower) with removable metal housing panels, oblong shaped tubular-section metal base fitted with adjustable stabilizer feet. Cables are channelled within the leg structure behind the removable panels, and exit through openings in the upper and lower extremities. Worktop height: adjusts at 2 cm intervals from 62 to 86 cm.

7 Open-sided 'L' shaped beam made from folded 1.2 mm sheet metal. Designed to store and channel trailing sockets and cables, features a 75 mm deep gully and 4 openings of 45 mm each. Available in an aluminium grey or graphite grey epoxy powder finish.

8 Melamine counterbalanced modesty panel, 19 mm thick in finish matching the worktops. Height 30 cm. Matching strip of 2 mm thick ABS edge banding. Features 2 cable ports so that cables can be fed through from the legs to the worktop.

9 Optional metal cable trough designed to be fitted to the modesty panel on the user side (not available for configurations with supporting pedestal). Height 8 cm, depth 7 cm and comes in an aluminium grey finish.

Technical specifications

1 25 mm thick high-density particle board with a decorative sheet of melamine on both sides of the top. Edges protected by a 2 mm thick strip of ABS (in matching finish). Fitted with 2 injection moulded ABS cable ports Ø 80 mm in an aluminium grey finish..

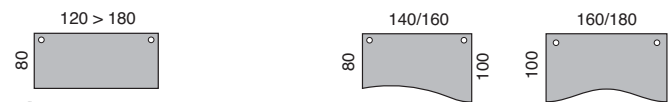

2 Height-adjustable desk (including worktop). Height adjusts from 68 to 135 cm thanks to an electric motor (37 mm/sec), activated by an easy to use elevation control panel.

3 L-shaped fixed steel legs attach to the extremities of the worktop, maximising accessibility. Tubular steel crossbar provides additional structural solidity.
